DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, 12-13 and 23, drawn to a rotatable applicator head.

Group II, claim(s) 10-11, 14 and 19-22, drawn to a method of forming thermoplastics.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group I is directed to a rotatable applicator head, a motor driven applicator including a rotatable applicator head and a method of making a rotatable applicator head, wherein a wall around a central recess of the applicator head is molded about a plurality of applicator wicks, constituting the "special technical feature" of Group I. Group II is directed to a method of forming a thermoplastic product, wherein a thermoplastic material is injected about a compressed portion of a porous material supported in a mold cavity, constituting the "special technical feature" of Group II.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
